

Join EFCC– The Voice of Construction Chemicals in Europe

Are you a raw material producer, formulator of construction chemicals, or a national association in the sector? Step into the center of European advocacy, regulation, and innovation by becoming a member of the European Federation of Construction Chemicals (EFCC).

We unite the industry to drive sustainable growth, shape legislation, and ensure the voice of construction chemicals is heard across Europe.

OUR ROLE

Based in Brussels, EFCC acts as the industry's spokesperson before European institutions and public authorities, addressing key topics such as:

- Regulatory and policy development
- Standardisation and innovation
- Sustainability and the circular economy

EFCC represents construction chemical manufacturers, raw material suppliers, formulators, and national associations across Europe.

OUR MISSION

- Influence European legislation and standards, including CPR, REACH, CLP, and sustainability frameworks.
- Support members with expert guidance, tools, and a strong collective voice in a fast-changing regulatory environment.
- Promote the construction chemicals industry as a proactive contributor to Europe's sustainable built environment - from infrastructure and buildings to renovation projects.

"EFCC unites and empowers Europe's construction chemicals industry to grow sustainably and stay competitive."

– Dr. Ekkehard zur Muehlen,
EFCC President

MEMBER BENEFITS

- Access to a Europe-wide network of industry experts and associations
- Direct engagement with EU legislators and stakeholders
- Training opportunities and model Environmental Product Declarations (EPDs)
- Up-to-date guidance on regulatory matters (reports, newsletters, issue trackers)
- Support in developing sustainable and safe technologies

"Through collaboration and advocacy, EFCC helps its members navigate complex European regulations while ensuring that these support innovation, sustainability, and fair competition across the single market for the construction chemicals industry."

– Ms Andrea Nam, EFCC Director General

WHY JOIN EFCC?

- **Amplify Your Voice in Europe**
Gain direct representation in Brussels and influence EU decisions that impact your business.
- **Stay Ahead of Regulation**
Receive timely updates, expert analysis, and practical tools to anticipate and adapt to new requirements.
- **Network & Collaborate**
Connect across the value chain - from suppliers to formulators and associations - to share insights and build partnerships.
- **Drive Sustainability & Innovation**
Use EFCC's platform to showcase your role in delivering high-performance, durable, and sustainable solutions for Europe's construction sector.
- **Leverage Shared Expertise**
Save time and resources through EFCC's collective know-how and active participation in leading European alliances, including Downstream Users of Chemicals Co-ordination Group, Cefic, Construction Products Europe, ASMoR, and the Construction 2050 Alliance.

"EFCC enables its members to turn regulatory challenges into opportunities - fostering innovation, sustainability, and competitiveness across Europe's construction chemicals sector."

–Mr Eric Dehasque, EFCC Board Member

EFCC WORKING GROUPS

Our technical work is led by three dedicated working groups:

- Construction & Standardization
- Product Stewardship
- Sustainability

Together, we shape European policy, drive innovation, and advance compliance and best practices across the construction chemicals industry.

READY TO TAKE THE NEXT STEP?

Visit our website at www.efcc.eu to learn more about EFCC and how to join. Together we can build stronger, safer and more sustainable construction-chemical solutions for Europe.
